EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Joe Zheng on 10/4/2006.
3. The application has been amended as follows:

Claim 9. (Currently amended) A multiplexing/-demultiplexing module configured for N channels, the module comprising: at least N optical filters, each specified for one of the N channels and transmitting an in-band signal and reflecting all out-band signals; and N concave mirrors, each placed in front of one of the N optical filters to receive the out-band signals for correcting titling errors carried in the out-band signals as a result of the one of the N optical filters being titled, wherein each of the N concave mirrors is placed in such as way that an incident optical distance from one of the optical filters is substantially similar to a reflected optical distance to another one of the optical filters.

Allowable Subject Matter

4. Claims 1, 3-13, and 15-19 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of

the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 9, and 13, with the allowable features being: at least N optical filters, each specified for one of the N channels, wherein the concave mirror is placed right after one half of the N optical filters (claim 1); wherein each of the N concave mirrors is placed in such a way that an incident optical distance from one of the optical filters is substantially similar to a reflected optical distance to another one of the optical filters (claim 9); a first half of N optical filters for multiplexing/demultiplexing a first half of the N channels, each of the N optical filters specified for one of the N channels and transmitting an in-band signal and reflecting all out-band signals (claim 13).

Therefore, claims 1, 3-13, and 15-19 are allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
